

You can enter up to four digital images in the Dual Projection Color Open section – any subject or manipulation is acceptable. You can also enter up to four images in the Nature Open section and up to four images in the Nature Wildlife section. You cannot split your entry in the Dual Projection Color Open section between slides and digital and entry in the Two Nature sections can only be made in digital form.

For the PSA definition of a Nature image please go to the [PSA Nature Division](#) site at the link just given.

You do not have to be a member of PSA to enter this exhibition.

We have simplified the entry procedure and all you need give us for any image is the title you want associated with the image such as Sleeping Cheetahs and then you can use the Browse button on the Entry form to point to an image file any place on your machine. The file name that you point to with the Browse button can be any file name that you have used for this image such as _img_4853.jpg and you need not conform to prior PSA file naming conventions.

Only JPG files are accepted .

The dimensions of the image are limited to 768 pixels in both directions, horizontal and vertical. This is not a capricious specification and is done to make horizontal and vertical images the same projected size. Digital cameras record in either a 2x3 or 3x4 aspect ratio. Thus in the 2x3 aspect ratio both horizontal and vertical images will be the same size either 768x512 or 512x786 pixels and 4x3 aspect ratio images will be either 768x576 or 576x768 pixels. This emulates the characteristics of a film slide whose dimensions are equal independent of whether they are horizontal or vertical images. **IF YOU HAVE IMAGES SIZED TO 1024 X 768 PIXELS AND DO NOT WANT TO RESIZE THEM ENTER THEM IN THE 1024 X 768 SIZE AND WE WILL RESIZE THEM FOR YOU.**

You need not be overly concerned about file size as we will accept any file that is smaller than 1.7 MB and the aggregate of all files is limited to 20 MB. Generate your files with the highest quality of JPG compression as long as they conform to the maximums just given.
